SECTION 1: PRODUCT & COMPANY IDENTIFICATION

1.1 Product Identifiers

Product Name: NANOMYTE® MEND 3000-UVP (Part A)
CAS Number: A CAS number has not been assigned to this material

1.2 Relevant Identified Uses of the Substance or Mixture and Uses Advised Against

This product is intended for use as a self-healing coating for plastics, metals, and other surfaces.

1.3 Details of the Supplier of the Safety Data Sheet

Company: NEI Corporation
Address: 400 Apgar Drive, Unit E | Somerset, NJ 08873 – USA
Phone: +1 (732) 868-3141 Fax: +1 (732) 868-3143
Email: productinfo@neicorporation.com

1.4 Emergency Telephone Numbers

Manufacturer: +1 (732) 868-3142 (9am to 6pm EST / UTC -0500)
U.S. Poison Control Center: +1 (800) 222-1222
ChemTel (North America): +1 (800) 255-3924 (during transportation only)
ChemTel (International): +1 (813) 248-0585 (during transportation only – collect calls accepted)

SECTION 2: HAZARDS IDENTIFICATION

2.1 Classification of the Substance or Mixture

GHS Classification in accordance with 29 CFR 1910 (OSHA HCS)
Flammable liquids (Category 2), H225 – Toluene, Ethylbenzene, Methyl methacrylate
Aspiration hazard (Category 1), H304 – Toluene, Ethylbenzene, Naptha
Skin irritation (Category 2), H315 – Toluene, Methyl methacrylate
Skin sensitization (Category 1), H317 – Methyl methacrylate
Acute toxicity, Inhalation (Category 4), H332 – Ethylbenzene
Specific target organ toxicity - single exposure (Category 3), Central nervous system, H336 – Toluene
Germ cell mutagenicity (Category 1B), H340 – Naptha
Carcinogenicity (Category 2), H351 – Ethylbenzene
Reproductive toxicity (Category 2), H361 – Toluene
Specific target organ toxicity - repeated exposure (Category 2), H373 – Toluene, Ethylbenzene
Acute aquatic toxicity (Category 2), H401 – Toluene, Ethylbenzene
Acute aquatic toxicity (Category 3), H402 – Methyl methacrylate
Chronic aquatic toxicity (Category 3), H412 – Ethylbenzene

2.2 GHS Label elements, including precautionary statements

Pictogram(s):

Signal Word: Danger

Hazard Statement(s):

H225 Highly flammable liquid and vapor
H304 May be fatal if swallowed and enters airways
H315 Causes skin irritation
H317 May cause an allergic skin reaction
H332 Harmful if inhaled
H336 May cause drowsiness or dizziness
H340 May cause genetic defects
H351 Suspected of causing cancer
H361 Suspected of damaging fertility or the unborn child
H373 May cause damage to organs through prolonged or repeated exposure
H401 Toxic to aquatic life
H402 Harmful to aquatic life
H412 Harmful to aquatic life with long lasting effects

Precautionary Statement(s):

P202 Do not handle until all safety precautions have been read and understood
P210 Keep away from heat / sparks / open flames / hot surfaces — no smoking
P241 Use explosion-proof electrical/ ventilating/ lighting/ equipment
P243 Take precautionary measures against static discharge
P260 Do not breathe dust / fume / gas / mist / vapors / spray
P264 Wash hands thoroughly after handling
P272 Contaminated work clothing should not be allowed out of the workplace
P273 Avoid release to the environment
P280 Wear protective gloves, protective clothing, eye protection, face protection
P301 + P310 IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician
P303 + P361 + P353 IF ON SKIN (or hair): Remove / take off immediately all contaminated clothing. Rinse skin with water / shower.
P304 + P340+P312 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a poison center or doctor/physician if you feel unwell.
P314 Get medical advice/attention if you feel unwell
P308 + P313 If exposed or concerned: Get medical advice/attention.
P333+P313 IF SKIN irritation or rash occurs: Get medical advice/attention
P362 Take off contaminated clothing and wash before reuse
P363 Wash contaminated clothing before reuse
P403 + P233 Store in a well-ventilated place. Keep container tightly closed.
P405 Store locked up
P412 Store at temperatures not exceeding 5 °C / 41 °F. Keep cool.
P501 Dispose of contents/container to an approved waste disposal plant.

SECTION 4: FIRST AID MEASURES

4.1 Description of First Aid Measures
General Advice:
Move out of dangerous area. Consult a physician. Show this safety data sheet to the doctor in attendance.

**After Inhalation:**
If breathed in, move person into fresh air. If not breathing give artificial respiration. If breathing is difficult, give oxygen. Seek medical attention.

**After Skin Contact:**
Wash off with soap and plenty of water. Seek medical attention.

**After Eye Contact:**
Flush eyes with water as a precaution. Seek medical attention if irritation persists.

**After Swallowing:**
Do NOT induce vomiting. Never give anything by mouth to an unconscious person. Rinse mouth with water. Seek immediate medical attention.

4.2 **Most Important Symptoms and Effects, Both Acute and Delayed**
The most important known symptoms and effects are described in section 2 and/or in section 11.

4.3 **Indication of any Immediate Medical Attention and Special Treatment Needed**
No Data Available (Note to physician - In acute cases of naphtha overexposure or ingestion, patients should be evaluated for signs of respiratory distress. Careful gastric lavage may be indicated.)

SECTION 5: FIREFIGHTING MEASURES

5.1 **Suitable Extinguishing Media**
Use water spray, alcohol-resistant foam, dry chemical, or carbon dioxide.

5.2 **Special Hazards Arising from the Substance or Mixture**
Carbon oxides

5.3 **Advice for Firefighters**
Wear self-contained breathing apparatus for firefighting if necessary. Do not breathe smoke, gases, or vapors generated.

5.4 **Other Information**
Use water spray to cool unopened containers. Vapors may cause a flash fire or ignite explosively.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 **Personal Precautions, Protective Equipment, and Emergency Procedures**
Use personal protective equipment. Avoid breathing vapors, mist or gas. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas. Contains a potential sensitizer. For personal protection, see section 8.

6.2 **Environmental Precautions**
Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided – contains components toxic to aquatic life.

6.3 **Methods and Materials for Containment and Cleaning Up**
Dike area to prevent spreading. Absorb on vermiculite, sand or other inert absorbing material. Dispose of as a chemical waste in accordance with current local, state and federal regulations. Contain spillage, soak up with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite), and then collect with an electrically protected vacuum cleaner or by wet-brushing. Transfer to a container for disposal according to local / national regulations (see section 13).

6.4 **Reference to Other Sections**
For safe handling, see Section 7; for personal protection, see Section 8; for disposal, see Section 13.

SECTION 7: HANDLING AND STORAGE

7.1 **Precautions for Safe Handling**
Contains a potential sensitizer! Appropriate personal protective equipment should be used at all times. Provide good ventilation or extraction. Avoid contact with eyes, skin, and clothing. Avoid inhalation of vapor or mist. Keep away from heat, sparks, flames and other sources of ignition – no smoking. Take measures to prevent the buildup of electrostatic charge. For precautions see section 2.2.
7.2 Conditions for Safe Storage (including any incompatibilities)

Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Ambient temperature storage is preferred; avoid temperature extremes. Avoid contamination with incompatible materials. Keep away from heat, sparks, flames and other sources of ignition. Residual vapors might explode on ignition. Do not apply heat, cut, drill, and grind or weld on or near this container. Storage class (TRGS 510): Flammable liquids

7.3 Specific End Uses

Apart from the uses mentioned in section 1.2 no other specific uses are stipulated.

SECTION 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

8.1 Control Parameters

Components with workplace control parameters

Notes: OEL – Occupational Exposure Limit; TLV – Threshold Limit Values; REL – Recommended Exposure Limits

8.2 Exposure Controls

Appropriate Engineering Controls

Handle in accordance with good industrial hygiene and safety practice. Keep away from food and beverages. Remove all soiled and contaminated clothing immediately. Wash hands before breaks and end of workday. Provide appropriate ventilation.

Personal Protective Equipment

Respiratory Protection:

Where risk assessment shows air-purifying respirators are appropriate, use a full-face respirator with appropriate respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Eye / Face Protection:

Face shield and/or safety glasses should be worn. Use eye protection equipment that is tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Hand Protection:

Handle with chemical resistant gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands after use.

Skin and Body Protection:

Complete suit protecting against chemicals, the type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Control of Environmental Exposure

Prevent further leakage or spillage if safe to do so. Do not let product enter drains.
SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.2 Other Information

Solids Content: 20 – 30%

SECTION 10: STABILITY AND REACTIVITY

10.1 Reactivity

No Data Available

10.2 Chemical Stability

Stable under recommended storage conditions (see Section 7.2)

10.3 Possibility of Hazardous Reactions

Vapors may form explosive mixture with air

10.4 Conditions to Avoid

Heat, flames and sparks

10.5 Incompatible Materials

Strong oxidizing agents, strong acids, strong bases

10.6 Hazardous Decomposition Products

No Data Available; in the event of fire, see section 5

SECTION 11: TOXICOLOGICAL INFORMATION

11.1 Information on Toxicological Effects

To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated. No data is available for the product; data provided is for the individual components, when available, and should not be considered complete.

**Acute Toxicity**

</tr>
<tr>
<td>Other Information</td>
<td>No Data Available</td>
</tr>
</tbody>
</table>

Issued: 05-March-2018 (v1.0)
Skin corrosion/irritation
PP: rabbit, 8 hours – slightly irritating; PGMEA: rabbit, non-irritant; Toluene: rabbit, Skin irritation - 24 h; MM: moderate irritation; EB: moderate irritation, with skin burns after prolonged contact; N: irritation

Serious eye damage/eye irritation
PGMEA: rabbit, slightly irritating; Toluene: rabbit, no irritation; MM: slightly irritating; EB: moderate irritation

Respiratory or skin sensitization
PGMEA: Dermal: non-sensitizer (Guinea pig, Magnusson/Kligmann (Maximization Test)); Toluene: No data available; MM: Allergic skin reactions in humans; EB: No allergic skin reactions in humans

Germ cell mutagenicity
PGMEA: Genetic toxicity in vitro: Ames: negative (salmonella typhimurium, Metabolic activation: with/without). Toluene: Rat, liver, DNA damage; EB: Negative;

Carcinogenicity
IARC: Group 3: Not classifiable as to its carcinogenicity to humans (Toluene & Methyl Methacrylate)
    Group 2B: Possibly carcinogenic to humans (Ethylbenzene)
    Group 1: Carcinogenic to humans (Naptha)
ACGIH: No component of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by ACGIH.
NTP: No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.
OSHA: No component of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by OSHA.
EB: Causes cancer in animals, but not likely relevant to humans; N: IARC Group 2B – possibly carcinogenic to humans, ACGIH A3 – confirmed animal carcinogen with unknown relevance to humans

Reproductive toxicity
For toluene only:
Damage to fetus possible
Suspected human reproductive toxicant
Reproductive toxicity - Rat - Inhalation
Paternal Effects: Spermatogenesis (including genetic material, sperm morphology,motility, and count).
Experiments have shown reproductive toxicity effects in male and female laboratory animals.
Developmental Toxicity - Rat - Oral
Effects on Embryo or Fetus: Fetotoxicity (except death, e.g., stunted fetus).

Teratogenicity
PGMEA: Rat, female, inhalation, 6 hrs/day 7 days/week, NOAEL (teratogenicity): >4,000 ppm, no teratogenic effects observed at doses tested.

Specific target organ toxicity - single exposure (Globally Harmonized System)
No Data Available

Specific target organ toxicity - repeated exposure (Globally Harmonized System)
No Data Available

Aspiration hazard
MM: may be harmful if swallowed and enters airways; EB: Aspiration into the lungs may occur during ingestion or vomiting, causing lung damage or even death due to chemical pneumonia. May be fatal if swallowed and enters airways

Other information
May cause an allergic skin reaction and irritation.
To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.

SECTION 12: ECOLOGICAL INFORMATION

12.1 Toxicity
The toxicological properties of this material have not been fully investigated. No data is available for the product; data provided is for the individual components, when available, and should not be considered complete.

Ecological Data for Propylene Glycol Monomethyl Ether Acetate:
Biodegradation
Aerobic, 100 %, Exposure time: 8 Days
Acute and Prolonged Toxicity to Fish
LC50: 161 mg/l (Fathead minnow (Pimephales promelas), 96 h)
Acute Toxicity to Aquatic Invertebrates
EC50: 408 mg/l (Water flea (Daphnia magna), 48 h)

Toxicological Data for Toluene:
Toxicity to fish: LC50 - Oncorhynchus mykiss (rainbow trout) - 7.63 mg/l - 96 h
NOEC - Pimephales promelas (fathead minnow) - 5.44 mg/l - 7 d
Toxicity to daphnia and
other aquatic invertebrates:
EC50 - Daphnia magna (Water flea) - 6 mg/l - 48 h
Immobilization EC50 - Daphnia magna (Water flea) - 8.00 mg/l - 24 h
Toxicity to algae:
EC50 - Chlorella vulgaris (Fresh water algeae) - 245.00 mg/l - 24 h
EC50 - Pseudokirchneriella subcapitata (green algae) - 10.00 mg/l - 24 h

Toxicological Data for MM:
Acute Toxicity to fish: Slightly toxic to aquatic organisms on an acute basis (LC50/EC50 10-100 mg/L in the most sensitive species tested).

Toxicological Data for EB:
Acute Toxicity to fish: Moderately toxic to aquatic organisms on an acute basis (LC50/EC50 10-10 mg/L in the most sensitive species tested).

Toxicological Data for N:
Acute Toxicity to fish: LC50, Fathead minnow (Pimephales promelas), 96 Hour, 2.5 mg/l, OECD Test Guideline 203.

12.2 Persistence and Degradability
Toluene: Biodegradability Result: - Readily biodegradable; MM: Readily biodegradable; EB: Readily biodegradable.

12.3 Bioaccumulative Potential
Toluene: Bioaccumulation Leuciscus idus (Golden orfe) - 3 d - 0.05 mg/l - Bioconcentration factor (BCF): 90
MM: Bioconcentration potential is low (BCF < 100 or Log Pow < 3).
EB: Bioconcentration potential is low (BCF < 100 or Log Pow < 3).

12.4 Mobility in Soil
MM: Potential for mobility in soil is high (Koc between 50 and 150)
PGMEA: Potential for mobility in soil is very high (Koc between 0 and 50)
EB: Potential for mobility in soil is low (Koc between 500 and 2000)

12.5 Results of PBT and vPvB Assessment
PBT/vPvB assessment not available as chemical safety assessment not conducted

12.6 Other Adverse Effects
An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

SECTION 13: DISPOSAL CONSIDERATIONS

13.1 Waste Treatment Methods
Product
Waste disposal should be in accordance with existing federal, state and local environmental control laws. Burn in a chemical incinerator equipped with an afterburner and scrubber but exert extra care in igniting as this material is highly flammable. Offer surplus and non-recyclable solutions to a licensed disposal company. Contact a licensed professional waste disposal service to dispose of this material.

Contaminated Packaging
Dispose of as unused product and discard container according to proper regulations.

SECTION 14: TRANSPORT INFORMATION

14.1 Department of Transportation (DOT - US)
UN number: 1866 Class: 3 Packing Group: II
Proper Shipping Name: Resin solution, flammable
14.2 International Maritime Dangerous Goods (IMDG)

UN number: 1866  
Class: 3  
Packing Group: II  
Proper Shipping Name: Resin solution, flammable

14.3 International Air Transport Association (IATA)

UN number: 1866  
Class: 3  
Packing Group: II  
Proper Shipping Name: Resin solution, flammable

14.4 Other

HS Code (first 6 digits) / HTS #: 3208.90.0000

SECTION 15: REGULATORY INFORMATION

15.1 Safety, Health and Environmental Regulations/Legislation Specific for the Substance or Mixture

SARA 302 Components

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA 313 Components

The following components are subject to reporting levels established by SARA Title III, Section 313:
